Big Bend Healthcare Coalition COVID-19 SITUATION REPORT #2

APRIL 2, 2020

Statewide Conference Call Summaries

State EOC/Florida Hospital Association Conference Call, 4/1/20 - Notes

- Abbott Point of Care testing coming to Florida. FDOH will notify when it is available.
- ESS continues to expand the types of information being requested. This information is vital to evaluate and inform models and gain understanding of rates of increase in hospitals, ICU and ventilator demand.
- Changes to Medicare eligibility means most individuals will retain eligibility.
- EMS staff transporting to sub-acute facilities are required to go through the facility screening process, unless it is a cardiac call. EMS staff are screened before they begin their shift, but still should be screened at facilities.
- There are reports of fraudulent masks being sold. BE CAREFUL! Ensure that you are purchasing from a reputable vendor.
- Surge Plans need to be in place and ready to be implemented. A regional approach to managing surge is the most effective.
- Consider long-term planning - healthcare workers may be exposed at home and work; in some areas, healthcare workers are choosing to stay at local hotels rather than at home to protect their families.

Response & Recovery Operations Resources

So many of you are preparing for and responding to the COVID-19 pandemic and trying to manage a constant barrage of information. Our Assistance Center has responded to hundreds of requests for technical assistance. We hear you, and we're here to help. Together with our subject matter experts, we are vetting and sharing information on our recently developed Novel Coronavirus Resources Page. There you'll find links to:

- Planning resources
- Select technical assistance requests
- ASPR TRACIE-developed infectious disease resources
- Select comprehensive Topic Collections related to pandemic planning & response.
- ASPR TRACIE COVID-19 Alternate Care Site Resources
- COVID-19 Alternate Care Site Staffing
- ASPR TRACIE COVID-19 Crisis Standards of Care Resources

SURGEON GENERAL'S PRIORITIES

Florida's 5 STEPS to Prevent COVID-19

1 STOP INTRODUCTION

Stop Introduction into Florida from out of state.

2 TEST, TEST, TEST

Leverage testing capabilities & work to expand capacity.

3

ELDERLY & VULNERABLE PROTECTION

Protect the elderly by increased mitigation and messaging at assisted living centers, nursing homes, and other special facilities.

4

PREPARE HOSPITALS

Assess the potential impacts and course of action for hospitals and bed capacity.

5

SOCIAL DISTANCING

Continue to message social distancing.

ESS INFORMATION FOR REPORTING FACILITIES

- ESS is critically important for the State to anticipate demand in the hospital & sub-acute care setting. This data influences decisions on the need for additional support and equipment requests from federal government.
- Facilities MUST verify and update data 2x daily.
- ESS is adding more fields daily. Instructions on these new fields available on the AHCA ESS website.
- Hospitals should estimate the number of med surge beds that can be converted to ICU beds. Do not duplicate bed numbers in different categories. Start with highest acuity beds.
- Corporate Representatives can be established to monitor data entry at individual facilities. Contact AHCA for assistance.
